Metro Vancouver, British Columbia, Canada

Summary

With over 14 years of comprehensive experience in web development, I specialize in crafting scalable, intuitive, and high-performing applications. Adept at developing responsive and accessible user interfaces, optimizing application performance, and mentoring teams, I thrive in collaborative, agile environments. I bring a passion for problem-solving and a keen eye for modern UI/UX design principles, ensuring robust solutions that enhance user experience and streamline workflows.

Career Timeline

Current Apr 2025	**Senior Software Engineer** at Xsolla
Sept 2024 June 2022	**Senior Software Engineer** at Ooma
Sept 2022 Apr 2019	**Lead Software Engineer** at Simpplr
Apr 2019 Jul 2016	**Senior Software Engineer (Full Stack)** at RSG Media
Jul 2016 Dec 2014	**Software Developer** at 9.9 Media
Dec 2014 May 2013	**Software Developer (UI)** at Nineteen Apparels
Mar 2013 Mar 2012	**PHP Developer** at Diametric Solutions

Skills

Languages	TypeScript, JavaScript (ES6+), HTML5, CSS3, SASS
Frontend	ReactJs, NextJs, Redux (RTK Query), GraphQL, Flexbox
Testing	Jest, React Testing Library, Playwright, Cypress, Enzyme, Storybook
Tooling & CI/CD	Webpack, Vite, Turborepo, Esbuild, ParcelJS, Gulp, Jenkins, GitLab CI
Backend	NodeJS, MySQL, PostgreSQL, MongoDB, Golang
Cloud & Version Control	AWS (Lambda, EC2, S3), Google Cloud Platform (GCP), Salesforce, GitHub, GitLab, Bitbucket
AI Tools	Claude Code, GitHub Copilot, Cursor, Gemini, OpenAI Codex
Other	Magento, WordPress, Linux, MacOS, Windows, Bash, Zsh

Experience

Xsolla - *Montreal, Quebec, Canada - (Remote)* 2025 - Current

xsolla.com

Xsolla Quest Platform (QP) is a Go microservices monorepo powering the Xsolla Offerwall, an ad-tech platform where users earn rewards (Xsolla Points, virtual currency, gift cards) by completing in-app offers, watching videos, and installing games, serving both a publisher-facing admin panel and a user-facing offerwall/rewards experience.

- Architected unified Publisher App & Revenue Share administration tools, building complex validation schemas, reactive form inputs, and inheritance displays to streamline partner configurations across placement types.
- Engineered robust programmatic navigation controls by implementing a pre-navigation readiness pattern to eliminate race conditions and rendering artifacts during route transitions.
- Upgraded cross-platform video player capabilities, adding seamless portrait/landscape orientation switching and resolving touch-target hit-box issues in landscape mode.
- Delivered a pixel-perfect First Time User Experience (FTUE) from Figma specifications, engineering custom layout adaptations, dynamic button positioning, and optimized image rendering for fluid onboarding.
- Resolved complex mobile layout and z-index collision issues, repairing bottom navigation overlaps, sticky CTAs, and tooltips to ensure consistent usability across screen densities.
- Optimized list state management, implementing scroll position preservation across deep navigation stacks on rewards and offer wall screens.
- Overhauled frontend analytics pipelines, injecting persistent device headers, implementing fetch keepalive mechanisms to guarantee event delivery during page unload, and routing custom app event funnels.
- Fixed build export and service-resolution pipelines across web builds to ensure accurate Datadog APM tracking and third-party monitoring.
- Enhanced anti-fraud and backend tracking systems, extending model schemas and refining third-party fraud verification response handling.
- Integrated SonarQube automated code quality analysis into offerwall project CI/CD pipelines to enforce static analysis standards and security scanning.
- Implemented secure authentication and session handling across the publisher admin panel using JWT-based access tokens and OAuth2 flows, safeguarding partner-facing routes and API calls.

TypeScript | NextJs | ReactJs | React Native | Expo | Tamagui | Go | Jest | React Testing Library | Datadog | SonarQube | JWT | OAuth2

Ooma - *Vancouver, British Columbia, Canada - (Hybrid)* 2022 - 2024

ooma.ca

Ooma, Inc. is a publicly traded telecommunications company based in Silicon Valley, California, offering communication services including Voice.

- Improved the page load by 70% performance of the Call Center screen by optimizing the react component by using debugging tools like React Profiler and Chrome Devtools.
- Merged the Admin Portal application to host app, Commland using the front-end microservices library Single-spa resulting in the reduction of duplicate code base by 7%.
- Developing reusable React Functional components saving significant development time by almost 50% across 4 projects.
- Collaborated with automation engineers to optimize testing processes, reducing regression issues by 40% and improving release efficiency.
- Developed a reusable autocomplete input component which auto-fills the address parts in different fields that fetches the real addresses using Google Maps API which helped in improving the user experience.
- Planning and building applications' data layer, caching, routing strategies and building shared component library using React and Next.js.
- Documenting code, contributing to style guides, and working in close coordination with various team associates.
- Created and maintained efficient API queries using GraphQL, integrating with Redux Toolkit (RTK Query) for data fetching and caching.
- Led the migration of a complex phone system admin portal and unified telecom application from JQuery and Javascript to React.js SPA.
- Redesigning and implementing modern UI/UX principles, improving application responsiveness, and enhancing maintainability.
- Optimized Cypress.js test suite to improve test execution times, leading to a more efficient and effective testing process

Simpplr - *Toronto, Ontario, Canada - (Remote)* 2019 - 2022

Video

Simpplr is a purpose-built SAAS platform to help your employees collaborate across departments and stay connected to the broader organization.

- I led and developed the native WYSIWYG editor on the micro-frontend architecture (MFE) to replace the existing library. This benefited from avoiding the yearly cost of using the third-party library by a couple of hundred dollars and reduced the host app's code base by 5% by converting the code base in MFE, also providing a better feature-packed UI for the end users.
- Developed the "Native Video" feature that enabled the users to upload and play videos into the different parts of the application, e.g. while composing new posts. This benefited in reducing the dependency on third-party video service providers like YouTube, Vimeo, etc, instead them serving them from the private cloud platform.
- Developing new features using React and dependable UI libraries Build reusable components.
- Translating designs and wireframes into high-quality code, optimizing components for maximum performance across.
- Creating and updating unit test cases for each delivered module with maximum coverage using tools like Jest, and React Testing Library.
- Documenting and maintaining the technical workflows and specifications during the feature development on the Confluence platform.
- Gathering requirements for product owners, collaborating and having discussions for grooming requirements, followed by work estimations.
- Led the frontend team as Lead Software Engineer over a 1-year tenure, owning technical direction, sprint planning, and architectural decisions for the platform's editor and content modules.
- Mentoring team members and peers for any clarity on processes and projects.

ReactJS | NextJS | Typescript | Redux | React Query | Webpack | Jest | React testing Library | Cypress | Javascript | NodeJS

RSG Media - *New Delhi, India - (Onsite)* 2016 - 2019

Prophet 2.0

Analytics product used by Viacom Media Networks and others to keep track of ROI, reach, etc. of promo aired on the different media platforms.

- Used promo data to render them in different charts like Bar charts, and pie charts to better visualization for users.
- Used ParamQuery grid library to show and edit complex promo data in table format.
- Built and maintained GUIs using Handlebars/ ReactJS to provide usability to business data.
- Created RESTful API endpoints using NodeJS, and ExpressJS.
- Managing the versions and branches to staging and production servers using tools like GIT, sourcetree.
- Discussed, analyzed and strategized product design with Product Managers, the UX team and Business Managers.
- Tracking and resolving tickets for issues raised on the bug reporting tool (Bitbucket).

9.9 Media - *Noida, India - (Onsite)* 2014 - 2016

digit.in

- Implementing trending UI technologies like Lazyloading, InfineScroll, etc.
- Deploying and rendering Ads dynamically using Google API, etc.
- Implemented and Launched Accelerated Mobile Pages (AMP) version of news, stories to instantly render on google.com
- Created the Product Guru page for searching the products based on preference weight-age and showing the result on the fly.

JavaScript | jQuery | AngularJS | HTML | CSS

Nineteen Apparels - *New Delhi, India - (Onsite)* 2013 - 2014

shopnineteen.com

- Designed and developed custom Magento themes to enhance UI/UX, ensuring responsiveness and accessibility. Also, Custom Designed and developed custom Magento themes to enhance UI/UX, ensuring responsiveness and accessibility.
- Improvising page load time and persistent load time by optimizing, and minifying js, CSS and other assets.
- Optimized Magento themes for faster page load times by minifying CSS/JS, implementing lazy loading, and improving asset management.
- Ensured that Magento themes adhered to SEO best practices and accessibility guidelines for better search ranking and user experience.

Diametric Solutions and others - *New Delhi, India - (Onsite)* 2012 - 2013

iamnineteen.com, kippandludwig.com , theartjewellery.com, pennywisefilms.com, shuttlecockboys.com, diametricsolutions.com, abptechinc.com, babajiayurveda.in, indianbizmart.com

- Developing web pages quickly and effectively using HTML 5, CSS 3 and JS.
- Making the responsive layout using Flexbox, CSS Media Queries, CSS Grigs, frameworks like Bootstrap, MUI, etc.
- Good understanding of layout design, colours and typographical fundamentals.
- Checking and debugging cross-browser compatibility issues.
- Making the web application robust using an object-oriented design approach.
- Participate in requirements analysis, code reviews and project releases.
- Following the agile process which encourages new changes effectively using Jira.
- Experience in Internationalization and localization libraries like i18next.
- Full stack web development covering all dimensions using NodeJs, React, API interactions and API

Languages

English

Hindi

Strength

- Good interpersonal / communication Skills
- Determination, Problem-solving attitude and Quick learning
- Keen on acquiring new skills and learning new technologies.

Education

2012 **Bachelor in Technology, Computer Science** - Punjab Technical University, Kapurthala, India

2007 **High school/ 12th Standard** - CBSE Board (Physics, Chemistry, Math), Delhi Kannada School, New Delhi
